iReal 2E Professional-Grade  
Handheld Color 3D Scanner

# Turn Your Idea into Reality

iReal 2E is a current flagship product designed for the human body and medium and large-sized object scanning. The professional-grade 3D scanner with an affordable price, its EX-W price of **US\$3,980**, is able to bring your bright ideas into reality. iReal 2E, as an entry-level professional handheld and color 3D scanner, has its own mission to become a top choice for 3D digital artists.

- Infrared VCSEL structured light technology
- Invisible scanning
- Hair scanning
- Not afraid of strong light, work perfectly indoors and outdoors
- Smooth scanning experience (580 mm\*550 mm Field of View, 720 mm Depth of Field)
- Four alignment modes (feature, texture, marker, and mixed)
- The highest accuracy is up to 0.1 mm

# 3D Digitizing Everything

iReal 3D will bring new changes to all fields, including but not limited to 3D printing (additive manufacturing), digitization and restoration of cultural relics, digital sculptures, artworks design, healthcare, film, television, animation, body art, clothing customization, VR, AR, and education and research.

# Exploring 3D World Together

Now, we are looking for more global partners and 3D lovers to let iReal 3D benefit more 3D creators and build a more attractive and richer 3D world together.

## **We hope:**

- You have a common value with us: be professional, absorbed, enthusiastic, and optimistic about 3D digitization and its future.
- You have designers or engineers who are familiar with ZBrush, Blender, or 3ds Max to do specialized technical support in your team.
- You have professional sales representatives with the selling experience of 3D scanners or printers.
- It will be better if you have an online store on e-commerce platforms such as Amazon.

We look forward to your contact and your joining !
